

Ultramatic AG new partner of Tramper Technology in Switzerland

Ultramatic AG recently became Tramper Technology's new partner for the Swiss market. The Winterthur-based family business of Hans-Martin Kessler and his son Martin Kessler provides a wide range of packaging solutions for the food industry in Switzerland.

"Our goal is to provide our customers with the most optimal and suitable solution for their needs" says Hans-Martin Kessler, managing director of Ultramatic. "Therefore, we only supply first-class machines and equipment. We are very pleased with the addition of Tramper's product range to our portfolio. The high quality of the tray denesters, filling systems, tray sealing machines and lidding solutions perfectly matches with our corporate image."

Marco de Koster, sales director of Tramper Technology, is happy with the addition of Ultramatic to the global partner network: "Both Tramper and its partners focus on providing outstanding service, whether it regards a new machine, new tooling, spare parts or maintenance. In the past we have successfully worked together with DGB Service AG (Marcel and Doris Grab), based in Boswil. Tramper would like to thank them again for the great projects and support, and now looks forward to working with Ultramatic!

In addition to Ultramatic AG in Switzerland, Tramper Technology has also recently expanded its global partner network in Germany (Unipack GmbH), Denmark (Selo Nordic A/S) and Canada (Chisholm Machinery Solutions).
